SUBJECT INDEX TO VOLUME 54

Aluminum
  hexokinase activity and, 297
Aluminum ions
  phosvitin and, 247
Ammonium monovanadate
  cytotoxicity of, 277
Antitumor activity, 21, 39, 107, 207, 221
Apo-carbonic anhydrase
  zinc transfer reaction to, 147
Apoprotein
  basal metallothionein in tumors and, 91
Arsenic
  metallothionein and, 267
Binary complexes
  copper(II) and mixed-ligand, 187
Biomimetic system
  iron(III) porphyrins atropisomers as catalysts for cyclohexane hydroxylations, 55
Bis(platinum) complexes
  monofunctional and bifunctional, 207
Chloroplast thylakoid membranes
  iron ions complexation with proteins of light-harvesting complex of, 79
Chromatography
  basal metallothionein in tumors, 91
Chromium(III)
  L-glutamate complexes of, 49
Conformational transitions
  metal ion interaction with synthetic DNA, 167
Copper
  removal from metallothionein, 157
Copper(II) and molybdenum(VI) uronates, 33
Copper(II)
  complexes binuclear, 187
  photohemolysis inhibition by, 257
Cyclohexane hydroxylations
  iron(III) porphyrins atropisomers and, 55
1,2-Diaminocyclohexane platinum(IV) complexes
  synthesis and antitumor activity of, 39
1,3-Dithiol- and 1,3-dithiolan-2-ylidenemalonatoplatinum(II) complexes
  synthesis, structure, and antitumor activity of, 107
DNA
  bis(platinum) complexes and sequence specificity of, 207
  metal ion interaction with, 167
  nickel(II) complexes in modification of, 199
E-1-*p*-Methoxyphenyl-4-hydroximinomethylimidazole
  metal complexes of, 21
Electron paramagnetic resonance spectroscopy
  manganese(II) binding to transferrin, 1
Electron-transfer processes
  glutathione oxidation, 131
Glucose
  mercury(II) coordination to carbohydrate amino acids and, 141
Glutamate
  chromium(III) and, 49
  tridentate coordination of, 49
Glutathione
  oxidation of, 131
Heterocyclic dicarboxylate-platinum(II) complexes, 107
Hexacyanoferrate(III)
  glutathione oxidation by, 131
Hexokinase activity
  aluminum inhibition of, 297
Histadine
  copper(II) binary complexes and, 187
Hydrazides
  platinum(II) complexes of benzoic- and 3-methoxybenzoic acid, 221
Iron-dextran complexes
  analysis of, 285
Iron stearate compounds
  synthesis and characterization of, 115
Iron(II) and iron(III) ions complexation
  with proteins of light-harvesting complex of chloroplast thylakoid membranes, 79
Iron(III) porphyrins atropisomers
  cyclohexane hydroxylations and, 55
Ketoprofen
  photohemolysis by, 257
Kojic acid
  organomercury complexes of maltol and, 67
Lipid peroxidation
  vanadium and, 277
Malonatoplatinum(II) complexes
  antitumor activity of, 107
Maltol
  organomercury complexes of kojic acid and, 67
Manganese(II)
  transferrin and, 1
Mannose
  mercury(II) coordination to carbohydrate amino acids and, 141
Mercury(II)
  coordination to α-amino acids, 141
Metal complexes
  DNA modification and, 199
  iron(II) and iron(III) ions complexation, 79
  1-*p*-methoxyphenyl-4-hydroximinomethylimidazole and, 21
Metal ions
  DNA and, 167
Metallothionein
  copper removal from, 157
  selenium and arsenic interaction with, 267
  structure and functions of, 147
  tumors and, 91
Mössbauer spectroscopy
  iron-dextran complex analysis with, 285
Molybdenum(VI) and copper(II) uronates, 33
Nalidixic acid
  zinc(II) complexes and, 235
Nickel(II) complexes
  DNA modification promoted by, 199
Organomercury(II) complexes
  kojic acid and maltol, 67
1-*p*-Methoxyphenyl-4-hydroximinomethylimidazole
  E and Z isomers of, 21
Phosvitin
  aluminum ion interaction with, 247
Photohemolysis inhibtion
  copper(II) complexes and, 257
Platinum complexes
  monofunctional and bifunctional, 207
Platinum(II) complexes
  benzoic- and 3-methoxybenzoic acid hydrazides, 221
Platinum(IV) complexes
  synthesis and antitumor activity of, 39
Polargraphy
  molybdenum(VI) and copper(II) uronates, 33

Porphyrins
synthesis of, 55
Positron annihilation technique
iron-dextran complex analysis with, 285
Protein phosphorylation
aluminum and, 247
Quinolone drugs, 235
S-methyl-glutathione
vanadyl(IV) cation interaction with, 75
Selenium
metallothionein and, 267
Silicic acid
aluminum and, 297
Spectroscopic studies
bis(platinum) complex synthesis, 207
iron-dextran complexes, 285
iron stearate compounds, 115
iron(II) and iron(III) ions complexation, 79
manganese(II) binding to transferrin, 1
organomercury(II) complexes, 67
1-*p*-methoxyphenyl-4-hydroximinomethylimidazole E and Z isomers of, 21
platinum(II) complexes of benzoic- and 3-methoxybenzoic acid hydrazides, 221
vanadyl(IV) cation interaction with S-methyl-glutathione, 75
Stearic acid
iron stearate compounds, 115
Structural transitions
metal ion interaction with synthetic DNA, 167
Superoxide dismutase (SOD)
photohemolysis inhibition by copper(II) complexes and, 257
Tetrathiomolybdate
copper removal from metallothionein by, 157
Trans-l-DACH
antitumor activity of, 21
Trans-dl-DACH
antitumor activity of, 21
Transferrin
manganese(II) binding to, 1
Trypanosoma Cruzi
antimicrobial activity against, 21
Tumors
basal metallothionein in, 91
Uronic acids
copper(II) and molybdenum(VI), 33
Vanadium
cytotoxicity of, 277
Vanadyl(IV) cation
S-methyl-glutathione interaction with, 75
Vitamin B^{12}
metallothionein and, 267
Z-1-*p*-Methoxyphenyl-4-hydroximinomethylimidazole
metal complexes of, 21
Zinc transfer reaction
apo-carbonic anhydrase and, 147
Zinc(II) complexes
nalidixic acid with, 235
